SUMMARY

ML Engineer · B.E. Electrical Engineering · 1st Prize, National Level Project Competition (Tantragyan 2026, Hardware Category). Built an NLP spam classifier at 93% accuracy (Word2Vec/GloVe) and an award-winning IoT + ML cold storage system with ₹40k ISHRAE Grant. 3 internships, 8 Google Cloud AI/ML badges. Hands-on with Gemini API, Vertex AI, RAG workflows, and open-source LLMs (Ollama/Mistral).

SKILLS

Languages: Python, SQL (PostgreSQL)
ML / DL: scikit-learn, XGBoost, LightGBM, CatBoost, TensorFlow, PyTorch, Pandas, NumPy, LSTM
NLP: NLTK, Word2Vec, GloVe, TF-IDF, Text Classification
AI / Cloud: Vertex AI, Gemini API, Ollama (Mistral, Phi3), Streamlit, Azure ML Studio, RAG, LangChain, FAISS
Tools: Git, GitHub, BeautifulSoup, Jupyter, ESP32 (IoT), Flask, MQTT, Raspberry Pi

PROJECTS

AI Smart Cold Storage - IoT + ML Research Project · ₹40k ISHRAE Grant 2024–2026

- Led data/ML architecture on a 3-person team (Parth: embedded firmware, Ayush: hardware integration, me: AI pipeline). Designed 3 modules: LSTM solar forecasting for pre-cooling, 2-stage spoilage detection (gas sensors + ResNet50 vision), RAG-based explainable maintenance.
- Energy model validated against real compressor dataplates; simulations project 20–30% power reduction. Awarded 1st Prize, Hardware Category, Tantragyan 2026 National Level Project Competition.

NLP Spam Detection System · github.com/Er-Rajas/Spam-Detection

- Benchmarked spam classifier using Word2Vec and GloVe embeddings on 10,000+ messages — achieved 93% accuracy, ~8% above TF-IDF baseline across 5 classifiers.
- Full pipeline: NLTK preprocessing → embedding extraction → training → evaluation (precision, recall, F1, AUC). Repo includes model comparison table.

EXPERIENCE

AI & Prompt Engineering Intern · [Vault of Code](#) Jun–Jul 2025 · Remote

- Integrated Mistral LLM (via Ollama) into an application workflow; built a structured response parser that automated task routing — eliminating an estimated 3–4 hrs/day of manual review.

AI Azure Intern · [Edunet Foundation](#) Apr–May 2025 · Remote

- Reverse-engineered and built a BeautifulSoup scraper for 50+ POSOCO/CEA government reports with inconsistent formatting (tables, embedded text, images). Designed flexible parser handling 3 document types — eliminated weeks of manual data extraction.

Data Science Intern · [CodTech IT Solutions](#) Dec 2024–Jan 2025 · Remote

- Developed NLP text classification pipeline (Word2Vec + GloVe, 93% accuracy) and built visual analytics dashboards for pattern analysis on unstructured text datasets.

CERTIFICATIONS & ACHIEVEMENTS

- 1st Prize Hardware Category · Tantragyan 2026, National Level Project Competition · April 2026
- ₹40k Research Grant · Indian Society of Heating, Refrigerating & Air Conditioning Engineers (ISHRAE)
- Merit Certificate – Aavishkar 2025–26 (District-level Finals) · Jan 2026
- Google Cloud Skill Badges (8) · 2025: Intermediate (Gemini API + Vertex AI, Multimodal RAG, GenAI Apps). Completion: Professional ML Engineer Study Guide, Intro to AI/ML on Google Cloud

INTELLECTUAL PROPERTY

- Registered Design, AI Smart Cold Storage System · Design No. 496644-001 · Published, Indian Patent Office

EDUCATION

Bachelor's of Engineering (B.E) in Electrical Engineering 2021–2026

- Lokmanya Tilak College of Engineering, Navi Mumbai
- University of Mumbai
